

Leonardo Nuccilli

I'm a Graphic & Visual Designer with a strong interest in the world of Graphics and Visual Communication. I've built my career by combining a solid theoretical foundation (Semiotics, Chromatology, Principles of Design, etc.) with practical experience in the corporate and creative fields. I work with a multidisciplinary vision: from Layout to Packaging, to experiments with Artificial Intelligence and Video Editing. I'm passionate about transforming ideas into images that speak, enspire and narrate.
